

**NOTES:**

The minimum radius that can be built using Standard Full Length Stepoc blocks (L2) is 14.5m (internal) whilst not requiring any additional work. Tighter radii can be achieved by opening up the back joint between the blocks and filling before the concrete is poured.

When laying, care should be taken that the nibs and jaws overlap by at least 3mm.

The rebar should be set out at multiples of 200mm as instructed by the Structural Engineer.

Project 200mm Stepoc - Standard Details		 <p>Units 1 &amp; 2, Cosgrove Business Park Soot Hill, Anderton Northwich Cheshire CW9 6AA Tel: 0333 234 3434 www.andertonconcrete.co.uk</p>
